

A message from the Board

Norwich International School was founded in 2014 to service the educational needs of the Rama 2 area. From the outset the objective has been to create a first class international facility catering for students from 2 years old in Nursery to 18 years old in our Secondary IB college. The first phase of the school was opened to cater for Primary and Early years but we are now putting the final touches on our new Early Years Center, a building carefully designed for the formative years of 2 to 5, and increasing the range of specialist facilities in Primary by adding a new top class science laboratory.

Not forgetting the sporting needs of our students we have added a new games field and football pitch together with a new hall for indoor air conditioned sports such as Badminton and volley ball, all will be complete by May 2016.

This year will also see the arrival of additional qualified teachers from the UK to add to our team and a new Head of Early Years for the new center, all exciting prospects for the school as we advance into 2016

Kind regards

Geoffrey Potter

Chairman of the Board

Norwich International School
